SIAES
SELART INTERNATIONAL ASSOCIATION FOR EDUCATION AND APPLIED SCIENCES
FRANCE

Selart International Association for Education and Applied Sciences

An independent French non-profit association (loi 1901)

Presentation to SIERG · 2026-2027 · siaes.eu

SIAES
INTERNATIONAL SCHOOL
PARIS FRANCE ASSOCIATION

OUR SCHOOL

The International School of Applied Education

- SIAES carries an international school: the **SIAES International School of Applied Education**.
- It is dedicated to **professional education**.
- It is made for vocational and technical high schools.

WHERE WE ARE ROOTED

Paris Region, Genopole campus

1

SELART France

Our founding member. We share the same premises, on the Genopole campus.

2

Genopole

A leading biotech hub: 87 companies, 17 research labs, 28 technology platforms.

3

Université Évry Paris-Saclay

Associated with Paris-Saclay, 1st in France in the 2026 Shanghai ranking.

Memoranda of understanding signed by SELART France and SIERG with Genopole and the university.

MISSION

Excellence in professional education

> Our mission is to promote excellence in vocational, applied, professional, technical and lifelong education.

> We do it through international cooperation, innovation, quality, mobility and capacity building.

ROADMAP

Two phases

Phase 1: creation and launch

Professional and vocational training, teacher development, international mobility, institutional cooperation.

Phase 2: institutional development

An international institution of applied education, including a future international lycée, with the competent authorities.

THE IDEA

Complete the school, without changing it

- Our programs **complement** your school curriculum. They do not change it.
- Students gain practical skills and a clearer view of their career.
- They discover an international environment.
- The school strengthens its innovative and international profile.

OUR PROGRAMS

Two formats, online and international

3-month certification

12 weekly sessions of 70 minutes, hybrid. One international mobility of 7 days.

1-year professional diploma

32 weeks, one session per week, 64 academic hours. Two international mobilities of 7 days.

Online learning, practical projects, and international mobility.

OUR PRIORITY

Artificial intelligence

AI is what students, families and schools ask about today. We build it into the school.

Maxence Guichard: Master in Data Science and AI. He leads our AI courses and the promotion of the school.

Cyril Bauvais: PhD in computational drug design.
